

Jericho Wind Energy Centre

Community Liaison Committee (CLC): Meeting No. 3

November 17th, 2015 6:00 p.m. to 8:00 p.m.

The Legacy Recreation Centre, 16 Allen Street, Thedford, ON

On April 14th, 2014, Jericho Wind, LP, a wholly-owned subsidiary of NextEra Energy Canada, LP (NextEra), obtained approval from the Ministry of the Environment and Climate Change (MOECC) to build a wind energy centre in the Municipality of Lambton Shores and the Township of Warwick, in Lambton County, Ontario and in the Municipality of North Middlesex, in Middlesex County, Ontario.

We have established a Community Liaison Committee (CLC)

Good planning involves the community so we have established a CLC to discuss key aspects of construction, installation, operation, maintenance and retirement of the Jericho Wind Energy Centre. While this CLC is a requirement of our Renewable Energy Approval, it is also a vital part of our continued commitment to communicate and provide a forum to exchange ideas, share information and to offer project updates. The CLC is not intended to re-visit matters already addressed through the MOECC approval process.

About the Jericho Wind Energy Centre

The Jericho Wind Energy Centre has a maximum generating capacity of up to 150 megawatts, using 92 wind turbines; which is enough clean energy to power nearly 37,500 homes. The wind farm created over 200 construction jobs and currently employs 10 full-time local operations team members. Over its 20 year lifespan, this project is expected to contribute nearly \$9 million to local governments in property taxes and approximately \$30 million to landowners in payments.

About the Community Liaison Committee

The CLC is made up of people with diverse perspectives as well as varied backgrounds and experiences, in order to provide a broad and balanced perspective. Representatives of the following groups were invited to make up the CLC: persons residing or owning lands within 1 km of the Project; other area residents and landowners; members of the agricultural and business community; government agencies; local organizations; special interest groups; and Aboriginal, First Nation and Métis communities. A total of four (4) CLC meetings will be facilitated by AECOM. While committee membership has already been established (i.e., the application process is complete), all meeting materials (e.g., agendas, minutes, and presentations) will be made available for public review at

<http://www.nexteraenergycanada.com/projects/jericho.shtml>.

All meetings are open so that the public can attend and observe the conversation – requests for delegations are welcomed. **To be considered for a public deposition, please submit a request and the actual written deposition to Avril Fiskén (AECOM) by November 12th, 2015.**
