# Appendix C

## Glossary of Terms

## Appendix C. Glossary of Terms

---

*Non-Negligible Shadow Flicker Source*

*or equivalently*

*Significant Shadow Flicker Source*

A shadow flicker emission source which is determined to have a significant influence on the resultant shadow flicker exposures at a shadow flicker sensitive receptor. This is typically determined from a combination of site observations, measurements and available sound pressure or power data. Acoustical shielding effects or distance attenuation are often used as justification for excluding sources from this category.

---

*Point of Reception*

*or*  
*Shadow Flicker Sensitive Receptor*

Locations where excessive shadow flicker may disrupt the lives or activities of occupants/residents or in general where excessive shadow flicker would interfere with the intended use of the location under consideration.

---
