

# ROCK BLUFF ENERGY PARK

## Rock Bluff Energy Park

Located in Henderson County, Kentucky, Rock Bluff Energy Park is envisioned as a multi-technology energy facility. The project is currently in the early stages of development and is expected to incorporate solar PV installed on reclaimed coal mine lands and wind turbines that bring diversified income to local farming families.

The project may also include grid-scale battery energy storage, improving local electric reliability and allowing for the dispatch of power when needed. Rock Bluff Energy Park would bring resilient, local power generation to a community with a long history of powering America's economy. Cordelio is developing the project in collaboration with Tenaska.

Schedule a visit with a Tenaska land agent to learn more about this opportunity.

### COMMUNITY BENEFITS

Energy parks are considered important economic drivers for the community. These types of projects bring:

- ▲ Millions of dollars in additional property tax revenue
- ▲ Millions of dollars in collective lease payments to participating landowners

- ▲ Hundreds of construction jobs, as well as long-term operations jobs
- ▲ Opportunities for local businesses to provide goods and services to the project
- ▲ Additional economic activity and trickle-down benefits

### PHASES OF AN ENERGY PARK

Tenaska is a leading energy company with Nebraska roots. Over the past 35 years, Tenaska has earned a reputation for developing responsible energy projects and being a good business neighbor. We have developed, managed and/or operated approximately 22,000 megawatts of natural gas-fueled and renewable energy generating facilities.

Cordelio Power is a renewable power producer that develops, owns and manages wind, solar and battery storage facilities across North America. Cordelio is committed to working with landowners, communities and other project stakeholders in an efficient, safe and responsible manner.
